ABSTRACT OF THE DISCLOSURE

10 A method of linking control transfer information with sampling information
for instructions executing in a processor which includes storing information relating
to execution events, selecting an instruction for sampling, storing information relating
to the instruction for sampling, freezing the information relating to execution events
when the information relating to the instruction for sampling is to be reported to
provide frozen execution event information, reporting the information relating to the
instruction for sampling, and enabling access to the frozen execution event
information.
